

SmyUpgrades!

Boost your machine's performances by updating it to the latest technologies.

Did you know that SMI machines that are already installed in your plants can be **updated to the latest technologies** through the implementation of new applications, additional changeovers or new accessories? If you wish to **increase your machines' efficiency and performances**, a large range of upgrades is now available.

You just need to access the "**upgrades**" section on our website www.smigroup.it and select the type of update that better meets your requirements (e.g. cost reduction, process automation, energy saving, higher efficiency, etc.).

Innovative technologies within everyone's reach.

SMI designs and manufactures complete bottling and packaging lines mainly for the food & beverages industry. Thanks to the in-depth activity of **Research & Development**, SMI machinery are **constantly updated** with new applications which ensure the machine's user **higher operating efficiency, greater environmental sustainability and lower production and maintenance costs**.

The **good piece of news is that the benefits** of the latest technologies developed by SMI **can be integrated into the machinery already installed, as well**; this way, new applications, performances, accessories, additional changeovers, etc. can be installed by specialized operators of the after-sales service on most of SMI packers and blow-moulders.

For further information about "upgrades" package by SMI you can access our website or write an e-mail to angelo.zambelli@smigroup.net

Thank you for your kind attention.

Yours faithfully
