NEW HSR BLOWMOULDER:
THE TECHNOLOGY THAT
IS GOING TO CHANGE
THE WORLD OF PET
HALL A6 - STAND 303

**FASTER.
SMARTER.
GREENER.**

SMI's response to the pressing demands of the beverage industry for faster, more efficient and energy-saving bottle-manufacturing systems now has a new name: the **HSR (High-Speed Rotary) series** by Smiform.

It is a new range of truly innovative rotary stretch-blow moulders that is going to change the world of PET containers; the HSR series is the outcome of years of intensive research by SMI labs and boasts absolutely revolutionary technical solutions compared to other systems available on the marketplace.

Smiform's new stretch-blow moulders are capable of producing **up to 2,500 bottles per hour per cavity** (0.5-litre bottles), with an average **reduction of up to 40% of the installed power** and **of up to 30% of the absorbed power** if compared to traditional solutions.

DISCOVER IT NOW

We look forward to meeting you at our **stand 303 in Hall A6** and thank you for your kind attention.

Yours faithfully
