

**The evolution of SMIPACK continues with the restyling of the GHS series conveyors.**

For all the range we have significantly reduced the encumbrance of the electrical panel, while for the **GHS/B** models the novelty also concerns the introduction of the "pen" passage at the entrance of the conveyor.

These innovations, that you will surely appreciate, have however led to a small change in price; to this regard we invite you to contact our sales office for the new quotations.

We thank you for your attention and we remain at your disposal for any further information.

***Best regards***
