

SMI is a leader among the world-class constructors of packaging equipment; thanks to its division SMILine it offers a complete range of line engineering solutions:

- it designs and manufactures conveyor belts to move loose products or bundles within bottling and packaging lines.
- it designs and supplies turnkey plants.

When designing a machine layout, SMILine engineers have been combining the customer's exigencies with the market most innovating and competitive solutions, thus being able to meet the end user's specific requirements, both from a technical and from a sales point of view.

In order to optimize the machines performance, SMI:

- implements hi-tech control and supervision systems.
- integrates machines and equipment of the latest generation.
- guarantees a widespread, efficient technical service.

SMI manufactures production lines featuring:

- high-automation processes.
- great flexibility of applications and production.
- high reliability and safety standard.
- excellent performance/price ration
