

THE NEW LSK SHRINKWRAPPER: The "competitive & compact" machine!

SMI, a leader company in the packaging sector, will be exhibiting at SIMEI 2007 (stand U09 - Hall 13) the new series of LSK shrinkwrappers, ideal for outputs up to 35 ppm.

The LSK series features a new, simplified modular design, which ensures wide operating flexibility and high personalization of the packaging process.

Thanks to the use of first quality mechanical and electronic components, the new SMI shrinkwrappers are extremely reliable.

Main advantages:

- **versatility:** each machine can meet the market's most complex requirements, by handling different types of containers with a wide range of diameters, from 50 to 200 mm, in different configurations (film only - pad+film - tray+film - tray only) according to the selected machine model;
- **customization:** each machine can be equipped with several accessories, in accordance with the end user's special requirements;
- **reduced size;**
- **easy control:** through the POSYC control PC, equipped with LCD touch screen and an extremely intuitive man-machine interface;
- **competitive prices,** despite the high-tech solutions and the use of very reliable components.
