

**NEW AFW SERIES**  
**THE IDEAL PACKAGING**  
**SOLUTION FOR SQUARE**  
**CONTAINERS!**

## Find out the new AFW ERGON!

The **AFW (Angular Film Wrapper) ERGON** series arises from the need to offer a custom machine for packing square or rectangular bottom rigid containers, such as briks, or packages, bundles and clusters (cylindrical containers can be packaged as well, using appropriate optional accessories).

The **AFW series** is equipped with a 90°-entry product infeed conveyour which ensures a continuous and fluid packaging of odd-shaped containers, such as briks, or products that may be unstable during their motion on a conveyour belt.

This solution ensures an uninterrupted flow of the loose containers coming from the production line on a conveyour belts equipped with low-friction chains. In the shrinkwrapper's infeed section, loose containers are clustered in the required collation by a pneumatic device coupled with an electronic dividing axis (push-in system), before entering the film wrapping section and the shrinking tunnel.

For further information about AFW ERGON series, do not hesitate to contact SMI Sales Department.
