

In order to better diversify its offer, *Smipack* announces the separation of the historical FP range, which in future will only include the manual (*FP560*), semi-automatic (*FP560A-FP870A*), automatic (*FP6000-FP6000CS-FP8000CS*) L-sealers and their tunnels (*T450-T452-T650-T652*, the latter will come back in production from next June), from the now called HS range, which will include the continuous packers (*HS500E, HS500, HS500 SERVO, HS700*) and related tunnels (*T452H and T652H*).

Visiting our website <http://www.smipack.it/> you can find the sections [products](#) and [media center](#) already updated with videos, catalogues and photos, while for further information please contact our sales department.

Best regards
